Student assistance for energy mapping project

Associated departments: CSR & Finance
Samsøe Samsøe HQ: Ryesgade 19C, 2200 KBH N

Task description

As part of a mandatory energy audit at Samsøe Samsøe, we are currently mapping and structuring energy data for our Danish premises.

Due to limited internal resources, we need your assistance. Specifically, you will assist us with the following tasks:

- Map the primary energy source across all locations: electricity, district heating, gas or other
- Identify the energy source for heating for all locations
- Identify consumption values for heating for all locations
- Associated ad hoc tasks

We do not require any specific set of skills, or educational or professional background – only that you are structured and self-disciplined and will do your part to help us finalise the mapping and structuring before the deadline 15th of November 2022.

We look forward to hearing from you!
